## Projects

---

**Business Chat App**, *Technologies: Vue 3, TypeScript, Pinia, WebSockets, REST APIs, WhatsApp Business API, Meta Integrations, CI/CD*

Worked on a **production-ready business messaging platform** that enables companies to manage customer conversations across multiple channels from a single dashboard.

**Smart Saving**, *Technologies: Vue 3, Vuex, Tailwind CSS, PrimeVue.*

Developed a fund distribution system that helps users automate and manage their savings efficiently. Designed an intuitive user interface and integrated a wallet system for secure fund tracking and allocation.

**Tech Radar Project**, *Technologies: Vue 3, Vuetify, Pinia, Bootstrap, Axios, ApexCharts.*

Built an AI-powered platform to generate tech reports with multimedia content. Integrated dynamic charts for trends visualization, handled API data flow, and crafted a responsive UI with efficient state management.

**Courses SaaS Platform**, *Technologies: Vue 3, Bootstrap, Vuetify.*

Created a multi-dashboard education platform for admins, teachers, and students. Focused on scalable frontend architecture, REST API integration, and responsive UI components.

**Safety Monitor**, *Technologies: Vue 3, Pinia, Bootstrap, Axios, ApexCharts.*

Developed a real-time safety monitoring system using custom APIs. Designed responsive dashboards for incident tracking and ensured seamless API communication and data updates.
